- **Shortcodes:** `[travel_timeline]`, `[travel_photo_uploader]`, `[travel_map]`

Installation Instructions

Installing the Theme

1. Download the theme files and create a zip file named `alaska-travel-theme.zip`
2. In WordPress admin, go to **Appearance > Themes**
3. Click **Add New > Upload Theme**
4. Upload the zip file and activate the theme

Installing the Plugin

1. Download the plugin files and create a zip file named `alaska-travel-plugin.zip`
2. In WordPress admin, go to **Plugins > Add New**
3. Click **Upload Plugin**
4. Upload the zip file and activate the plugin

Initial Setup

1. After activation, go to **Alaska Travel** in the admin menu
2. The theme will automatically create your travel days based on your itinerary
3. Create a page called "Photos" and assign it the "Photos Page" template

4. Add the travel countdown widget to your sidebar

Your Travel Itinerary (Pre-loaded)

The theme comes with these travel days pre-configured:

- **June 8:** Whistler Mountain and Gondola Rides, Vancouver
- **June 9:** Victoria and Butchart Gardens, Vancouver
- **June 10:** Stanley Park, Vancouver
- **June 11:** Travel from Vancouver to Minneapolis, Minnesota
- **June 12:** Corn Palace and Mt Rushmore, South Dakota
- **June 13:** Sturgis, Belle Fourche, Devil's Tower, South Dakota
- **June 14:** Yellowstone National Park, Wyoming
- **June 15:** Theodore Roosevelt National Park, Montana
- **June 16:** Crab Dinner at Minneapolis
- **June 17:** Mall of America, Archery and Fishing, Minneapolis
- **June 18:** Return to Tokyo

User Roles

Traveler Role

- Can edit and upload photos to travel days
- Can view all content
- Special login redirect to travel timeline
- Custom profile fields for travel information

Administrator

- Full control over all features
- Can manage travelers and photos
- Access to bulk import tools
- Travel statistics and overview

Google Photos Integration

For Each Travel Day:

1. Edit the travel day post

2. Add your Google Photos album URL in the "Google Photos Album URL" field
3. The album will be displayed with a prominent button on the travel day page

For Bulk Import:

1. Go to **Alaska Travel > Alaska Travel Admin**
2. Use the "Bulk Import Google Photos" section
3. Paste multiple album URLs (one per line)
4. The system will process and store them for assignment

Customization Options

Colors and Styling

- Edit `style.css` to change colors, fonts, and layout
- The theme uses a blue and gray color scheme that can be easily modified
- CSS variables are used for easy color changes

Adding More Travel Days

1. Go to **Travel Days > Add New**
2. Fill in the travel date, location, and activity type
3. Add your blog content and photos
4. Publish when ready

Custom Fields Available

- Travel Date
- Google Photos Album URL
- Weather
- Accommodation
- Location (taxonomy)
- Activity Type (taxonomy)

Shortcodes Usage

Travel Timeline

[travel_timeline] - Shows all travel days in timeline format
[travel_timeline limit="5"] - Shows only 5 travel days
[travel_timeline location="vancouver"] - Shows only Vancouver days
[travel_timeline activity="sightseeing"] - Shows only sightseeing activities

Photo Uploader

[travel_photo_uploader] - Shows upload form for current travel day
[travel_photo_uploader travel_day_id="123"] - Upload for specific travel day

Travel Map

[travel_map] - Shows interactive map of all locations
[travel_map height="500px"] - Custom height

Security Features

- All user inputs are sanitized
- AJAX requests use WordPress nonces
- Role-based permissions
- SQL injection protection
- XSS protection

Support and Customization

This is a custom-built solution for your specific travel blog needs. The code is well-commented and follows WordPress best practices. You can:

- Hire a WordPress developer for additional customizations
- Modify the CSS for different styling
- Add more custom fields as needed
- Integrate with other WordPress plugins

Backup Recommendation

Before uploading, make sure to:

1. Backup your current WordPress site
2. Test on a staging site first

3. Keep your Google Photos albums organized and accessible

File Structure for Upload

Create these two zip files:

alaska-travel-theme.zip containing:

- All theme files listed above
- Proper WordPress theme structure

alaska-travel-plugin.zip containing:

- Plugin PHP file
- Assets folder with CSS and JS
- Readme file

Your Alaska travel blog will be ready to document every moment of your incredible journey!
